COPERNICUS-"Deeper" lp (Newmore: PO Box 170150, Brooklyn, NY. 11217) DEEPER is as strikingly original as Jandek & Feedtime and, like those two giants, sounds far removed from anything you've heard before. Just about every style of music you can think of shows up here, sometimes in one song. This is a hard record to review because it's so hard to describe. I recommend it, if you're wondering. Although you should stay away if Anthrax is your idea of avant-garde music.--Steve.
