Copernicus Disappearance

Perhaps the most fitting way to describe Copernicus is as a performance poet. He refuses to be categorised as a musician but his music exudes strong elements of jazz, classical and avant garde. In New Jersey in 2008, Copernicus gathered together a large ensemble of improvising musicians and booked a day long session to produce this crafted album.

Pierce Turner was a musical director and also played keyboards and vocals. The album tells story and has some interesting moments. MC
