COPERNICUS, VICTIM OF THE SKY Ski Music -

Toss Copernicus onto your turntable, light the fuse, and take cover! KABOOM! it roars, it hisses, it belches, it guffaws, it rants in tongues, it waxes poetic and it wanes with huse abooze. This is not just an "album" -- both the lyrics and the music are, for the most part, unrehearsed and spontaneous -- this is volatile performance art. The most mind-exploding cut is "The Lament of Joe Apples", an unaccompanied ten minute monologue which must be experienced: words are useless to describe its power. KABOOM! KABOOM! KABOOM!
