COPERNICUS – Nothing
Exists 2010 (CD)

www.copernicsonline.net

MoonJune Records is re-releasing for the first time on CD, COPERNICUS' debut album 'Nothing Exists' It was originally recorded at RCA studios, New York and first released in 1985 Copernicus is a poet, a performer, a musically distorted mind, a New York avant garde figure of the last 30 years or so who reminds one of the great beat poetry generation. The whole album is based on the poet's poems, speeches and the 'music' here is absolutely avant garde with a jazzy classical feeling. Reading from the album's liner notes "The band COPERNICUS began with Copernicus, Larry Kirwan and Pierce Turner in 1978 at the Five Spot, St. Marks Place (New York City). Kirwan and Turner are the musical mother and father, but every musician who partakes designs his or her own part with vocals spontaneously created and performed by Copernicus" If you are into something different and want to experiment, try it, it helps sometimes.
